,We love to tell stories as part of our daily conversation. When we want to convey an important thought, we make use of stories for people to relate to it. Before kids hit the sack, we condition their minds through stories. Even when making a presentation, we cite tales or stories that prove a finding or a hypothesis to be worth accepting. These things that we pass on from one person to another have been going on for centuries. How did you think you knew about how your mother and father met if it were not for the stories they have shared with you? Stories are also important in describing how wonderful a wedding ceremony could look like. Without cameras, these will only be told by the word of mouth. Since our technology has been fast advancing, things that happened on your wedding day can be shared to your kids with the aid of videos. This time around, anyone who is interested to know about your love story will not have a problem visualizing what has transpired because it is better presented on videos. No one will miss the details of your wedding from the gown you wore till the tiniest expression that you had when you said "I do". Thanks to wedding videography, wedding stories are better told. Any couple whom are about to marry can have their video taken cinematically or journalistically. These are just two of the many styles that is typically offered by professionals. Of course, you can settle with the traditional way on which videos are captured as it is and chronologically whereas, these two styles add a dramatic twist to your wedding stories. Cinematic is one style that makes your videos look like what you see in the movies. These are customized in a way that it can tell a story, reliving the days when you met each other until the special day. It can be romantic, action or even comedy depending on your preferred genre. A professional is fully equipped with high-end equipment that allows them to make your wishes come true. It is also better done when the professional uses a high-definition technology. Journalistic is a different discipline or art that is used for this kind of activity. It is simply done by capturing images and edits them to make them more organized. Your wedding stories will be told in a way just like that of the documentary films: nothing too fancy nor would it be even fictional. This wedding videography is done spontaneously. Images are taken as it is and the editing just adds a little tweak to it by forms of captions or music. Videographers commonly use these two styles for their wedding package. Either way, both styles can be used as a better way to convey a love story. Anyone who will watch this can be deeply touched and even you as the main actors of the story will never fail to appreciate the beauty of your wedding day that you surely have missed. Time can fly so fast and even though it has been years from the day that you were joined together, you can still re-live the day or even tell the story in the most concise way. Summary, We all have our ways to convey our love stories to our kids and interested parties. Commonly we do it by word of mouth. However, if you want to make things more vivid for them, try telling it through videos. It has a better impact.,,The Transformers on DVD is here. It has been a long wait for those who are fans of this particular movie. There were fans already out there once the movie was announced as they had watched the cartoon of the Transformers long ago. New fans were born with the release of the Transformers at the movie theatre. It was one of the biggest money makers of 2007 and it will definitely do well with DVD sales as well. I don't want to spoil it for you if you haven't seen it yet and you are waiting for the Transformers on DVD. However, I will tell you that this is an action packed movie that your entire family will enjoy. There are plenty of good and bad Transformers that have come to Earth, both for very different reasons. The Decepticons have come to take it over and the Autobots have come to protect the people of Earth from it. The end of the DVD will inform you that they are in hiding all over the world watching and waiting. They are on the look out for the Decepticons to regroup and attempt to take over the Earth yet again. From the way the movie ends you can be sure there will be a sequel to it. Of course you have probably already heard about the upcoming release of it scheduled for 2008 if you don't get that impression from the end of the Transformers on DVD. If you really want to be taken back in time, you

should purchase the limited edition Transformers DVD box set. This is the only way to experience the first four seasons of this action packed cartoon from the 1980's. You will also get the original animated Transformers on DVD so you don't have to stand in line for it at the local retailers. If that is not enough for you though there is also a DVD with bonus material that you have never seen before. You will find this limited edition DVD set to be a very worthwhile purchase. You will enjoy being able to watch all of your favorite scenes from the episodes over and over again. Once you start watching these episodes you will quickly be able to identify many of your favorites that you watched long ago. For new fans that have only been exposed to Transformers in the new movie, this is the best way for you to find out what you missed out on so long ago. The DVD will have plenty to offer but unless you have this complete set of all the Transformers episodes you are really missing out. Make sure you go to online right away and place your order. There are only a limited number of these great box sets left, and you don't want to be without one. The price is right and they offer the very best quality so you can't go wrong by ordering the Transformers limited edition DVD box set.,, Desperate Housewives, a show on the ABC network in the USA is definitely a woman centric show and has been running for the past six seasons with a seventh season in the pipe line. This show critically is seen to be a portrayal of the gender roles that women play in today's society and their relations with the men of their house and how mindsets change and it can get sour at times. This is a show which therefore acts as a perfect representation of gender roles among women. This is very important as it gives women a new alternative of how they would want to be and who they can consider as their role models. Rather than having just one model to follow, through its entire journey, Desperate Housewives has given a varying view of gender roles in today's day and age. All the wives in the show are basically stay at home mothers but they are seen to all be having their own lives and aspirations and their obligations to their families. While Bree wants to be a housewife and spends her time teaching others to be good cooks and wives, but Gabby was a model and has a hard time being bogged down and fights it out. This is in stark contrast to Lynette which was a business woman but now is caught in the throws of married life which comes to a head in the sixth season where she finds herself struggle to cope up with the loss of her child and her strained relation with her husband. Furthermore it can also be seen as a kind of representation of the sexual liberation of women which was not seen in other television programs. Hence one can easily however argue that this is a portrayal of the greater stereotypes in society which plagues the human population today. This is one thing portrayed to a great effect in the latest season of this show where they bring in Robin the ex-stripper onto Wisteria lane and exploring a possibility of a possible Lesbian relationship between the newest entrants Robin and Katherine.,, Let me tell you about my friend, Alpha Female. She is a savvy young woman at the top of her profession, who can cook fantastically, speak three languages and drink your average Russian under the table, all while looking like a film star. Jealous? Of course. But, Alpha Female appears to have suddenly met her match in the form of a small, unpredictable creature: her newborn son. Alpha Female's route to motherhood was pretty much the ideal: with lovely Alpha Male for a few years, married in a tear-jerking ceremony, traveled the world, excelled at work. Then along came baby and Alpha Female backtracked along the evolutionary path and regressed into Pregzilla, devouring each and every pregnancy-related book, website and programme she could get her hands and ears on, with an all-encompassing need to know, to understand what she was going through, was about to go through, to be ready. I was flummoxed by emails and texts pondering the relative merits of strict routines and 'baby whispering'. I was no help. I thought 'baby whispering' involved Robert Redford and a horse's nostrils. Confused? I still am. Kids. Whether you're making them or raising them, it's a bit of a project, isn't it? A seriously long-term, oh-God-what-have-I-done sort of a project, admittedly. But the best bit is that you don't really need any qualifications to take part, just a bit of common sense. A finely calibrated sense of humour helps, too. Instinct, genetics, whatever,

something kicks in and we tend to muddle through. We immerse ourselves in the enjoyable consumerism, the paraphernalia of the task at hand. We confidently choose the booties, the buggy, the cot and the colour of the nursery. The Man of the House fiddles with baby monitors and does his best to get excited about the Bugaboo vs Baby Bjorn debate. And then, as we are in full thrust of the novelty of the growing bump, we start wondering if maybe we should take a quick flick through some of the parenting guides on offer, just to have a look, mind, so that we are a teensy bit prepared for life after the big event, The Birth. Any mother will tell you that the nine months of pregnancy are almost entirely devoted to staving off the terror of giving birth. We write birth plans with the vain idea that they will somehow lessen the sheer hideousness of labour and then we turn to distractions for the rest of the pregnancy. If we are clever, we turn to a nice gentle hobby. But some are tempted by The Books and terror of the birth is quickly replaced by the terror of Getting It Wrong, 'It' being the next eighteen years or so. You see, having kids is like coursework that never gets handed in but is, instead, continually assessed. Assessed by your peers, by your mother in law, by strangers in the supermarket, let alone by you walking the room with a thoroughly awake baby at 3am, wondering where you went wrong. And so back to Alpha Female. In her hormonally vulnerable state, she keenly felt the pressure to Get It Right. Baby 'guru' Gina Ford instructed her to get baby into a military, love starved routine immediately or face the consequences of having a socially inept three year old, while attachment parenting manuals urged her to give up any semblance of a life and breastfeed until puberty. I scoffed. I gave birth for the first time eight years ago and honestly don't remember feeling that pressure. Nowadays, it seems de rigeur to cook perfectly (thanks celebrity chefs), keep fit (er, thanks Z-list celebs with your pole dancing workout DVDs) and, most of all, be happy and calm and in control at all times. My scoffing became a strangled squawk as a quick browse of my shelves showed no less than 18 parenting-related books. Oops. Hormones do amazing things to your memory. Rummaging amongst all these books, most of which I hadn't even read, made me wonder what on earth possessed me to buy clearly conflicting tomes of 'advice' and left me shamefaced at the realisation that the only person to actually benefit from most of them was the author, laughing all the way to the bank. Against my better judgment, I read through them and immediately regretted it. Three kids later, my 'methods' have dissolved into the bribe-reward school of parenting which, curiously enough, doesn't seem to have a 'guidebook', even though it is the preferred method for most parents I know. Having been made to feel so inadequate by reading so much of how it's supposed to be done in a perfect world, I have decided to aim at how to be a good parent in the real world. Sometimes fish fingers are the best you can manage and yes, of course goldfish go to heaven, sweetheart. As for Alpha Female? Well, she has come to her senses, ditched the guilt and put two fingers up to other people's expectations. She went back to work last week.,,Desperate Housewives had been launched first in 2004 and throughout all of its seasons; the show had always remained popular with the viewers. The series received high critical acclaims as well a large and loyal fan base. The story is set in a suburban neighborhood where the erratic lives of the housewives who live on the street are followed through the episodes. As they face various challenges in their day to day life, some quite serious and others hilarious, viewers are left thirsty to know more. Everyone on the neighborhood has secrets and things are not as they seem. Wisteria Lane is where the housewives live and there are various mysteries and quite a lot of scandals that always find their way to the neighborhood. There are spouses who cheat, gay couples, dead bodies in the backyard, suicides and murders. Though Desperate Housewives is a soap opera, it is much more than that. There are numerous twists and turns through Desperate Housewives seasons 1-5 TV series as the episodes reveal and there is enough mystery to keep viewers glued to their seats. More than anything else, the TV series is known for its style quotient as portrayed by the lead characters and for its own unique blend of humor. There is enough drama for the soap opera fans and the narration itself is done by a deceased neighbor. There are several everyday

life issues and many touchy issues which are generally not touched by TV series which makes the experience all too real. Since its launch *Desperate Housewives* has won several Screen Actors Guild awards, Golden Globe as well as Emmy awards and had been reported to be the most popular show world wide in 2007. What makes the show unique is the characters and the cast of the show which add their own special touch to the series. The series is narrated by a deceased neighbor, Mary Alice Young who had committed suicide, the reasons of which remains a mystery to the women. It was her suicide that managed to bring in the other women closer in the neighborhood. When the season 1 kicks off, it starts off with Mary already dead and narrating the episodes as she sees it through her eyes. There are several flashbacks through the seasons when Mary's past life is shown as the other women try to figure out why she might have killed herself. The main characters on the show are Edie Britt, played by Nicollette Sheridan, Marcia Cross playing Bree Van De Kamp, Eva Longoria playing Gabrielle Solis, Felicity Huffman playing Lynette Scavo and Teri Hatcher playing Susan Mayer., if you want to make things more vivid for them, Your wedding stories will be told in a way just like that of the documentary films: nothing too fancy nor would it be even fictional, More than anything else, Three kids later, A finely calibrated sense of humour helps, through its entire journey, Well, Felicity Huffman playing Lynette Scavo and Teri Hatcher playing Susan Mayer. action or even comedy depending on your preferred genre, isn't it, Even when making a presentation, let alone by you walking the room with a thoroughly awake baby at 3am, speak three languages and drink your average Russian under the table, Eva Longoria playing Gabrielle Solis, Oops, I have decided to aim at how to be a good parent in the real world.
